

WATER SERVICE LINE INVENTORY

The City of Redwood Falls is working to complete an inventory of all water service lines within the system. We are asking residents to help with the process and perform a water service pipe material survey. The EPA is requiring this survey of all cities nationwide and is scheduled to be completed by May 31, 2024.

You can identify your pipe material by checking your household water service connections inside your home, typically located in your basement. Use the guide below to determine your water pipe material.

Once you determine your pipe material, complete the on-line survey by scanning the QR code. If you need assistance, please call City Hall at 507-616-7400.

LEAD

A dull, silver-gray color that is easily scratched with a coin. Use a magnet to detect the material – strong magnets will not cling to lead pipes.

GALVANIZED

A dull, silver-gray color. Use a magnet to detect the material – strong magnets will typically cling to galvanized pipes.

PLASTIC

Blue or black pipe.

COPPER

The color of a penny.

RESIDENT INFORMATION

The on-line survey will ask you to fill in the following information. Scan the QR code with your cell phone camera, just like you would when you take a picture. It will direct you to the survey automatically.

First Name: _____ Last Name: _____

Phone Number: _____ Email: _____

Property Address: _____

Utility Account #: _____

Please write the account number found on your utility bill.

Type of Occupancy: Owner Renter/Tenant

PIPE INFORMATION

Information that you will need to complete the on-line survey:

Based on the appearance, testing, or existing records, please select the appropriate material of your service line: Lead Galvanized Plastic Copper

Contact me, I do not know what material I have.

Scan here or visit: www.ci.redwood-falls.mn.us to take the survey online!
